

# AMP-1 E

## INNOVATIVE FEATURES

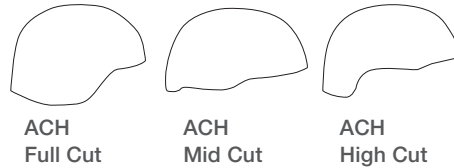

- Rails with Speed-System Connection Point
- Advanced padding system with improved wheel dial for ultimate sizing flexibility
- New harness system with no loose ends with crab buckle feature for single handed adjustment

## SPECS

- IIIA / STANAG 2920 | V50 2,230 f/s
- AMP-1 E advanced STANAG with Autoclave accelerated aging (V50 = 2144 fps)
- Back-face tested according to HPW-TPO401.018 Sec. 9
- US ACH AR/PD-10-02 Rev A, 2014 (average below 77 g)
- EN 397 blunt impact tested varying temperatures

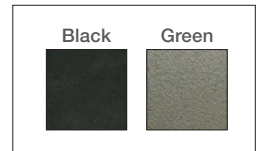

All helmets come with rails, an advanced padding system, and a wheel dial for ultimate sizing flexibility

## HELMET CUTS

## OPTIONS/ACCESSORIES

- Non Ballistic Impact Visor (Independently tested (Chesapeake Labs) blunt impact tested to 100 Joules)
- Non Ballistic Impact Visor with rubber seal (Chesapeake Labs) blunt impact tested to 100 Joules)
- Non Ballistic Fragmentation visor (Independently tested (Chesapeake Labs) STANAG 2920 - 1,082 f/s)
- NIJ IIIA Ballistic Visor (Independently tested (Chesapeake Labs) 9mm/44 Mag)
- VPAM Ballistic Visor Independently tested (Melrichstadt Labs)
- Ballistic neck protection (9mm Ballistic and non-ballistic) - Independently tested (Melrichstadt Labs)
- Ballistic Mandible/Chin guard (9mm tested)
- 3-Hole NVG Shroud
- Helmet Cover Black or Green
- Helmet hook and loop Kit
- Helmet Counter weight Kit
- Visor protective cover
- Side-rail adaptor
- Peltor adaptor
- Hydro dip patterns available

The AMP-1 E specialized aramid shell is independently tested and certified at Chesapeake labs to NIJ IIIA (9mm and 44 Magnum), against fragmentation according to STANAG 2920 with a V50 rating of 2,230ft/s. Our standard features include an advanced padding system, wheel-dial system, and unique rail system. These components ensure that comfort, practicality, and capability are provided, giving the user an added degree of confidence. The unique rail-system and its Speed Connect System (SCS) gives the user even more tactical and modular protective capability. Our modular protective visors (Impact, Fragmentation, 9mm/44Mag) can be added/removed from the helmet in seconds without ever having to take off the helmet - always being protected. More recently we have increased the protective modular capabilities with our BAN-1/CAN-1 (Ballistic/Non-ballistic neck protection), BAM - 1/CAM-1 (Ballistic/Non-ballistic mandible/Chin guard and our non-ballistic visors with the rubbers seal.
