

# INTRODUCING RESPONDER<sup>BASE</sup>

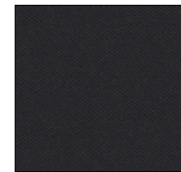

## INNOVATIVE FEATURES

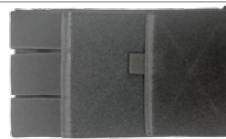

- Front and rear secure pockets that can accommodate 10"x12" plates, up to 1.25" thick
- MOLLE webbing platform on front and back for complete customization
- Padded mesh inside lining reduces weight and offers extra cushion and comfort
- Two front hook and loop pockets allow for extra magazines and utility storage
- Adjustable padded shoulder straps with padded mesh to ensure proper fit and comfort
- Reinforced carry handle
- MOLLE Cummerbund offers additional modularity and attachment points
- The removable & adjustable cummerbund comes in two sizes: **XS-M** (Fits chest Size 35-44) or **L-2XL** (Fits chest Size 42-52)

Ranger

*Accessories shown here sold separately*

The Responder BASE Plate Carrier now accepts replacement cummerbund straps that include pockets for soft armor.

**Responder Base** - The Responder Base Plate Carrier provides a robust and layered platform for any active shooter response. With reinforced padding for extended duty, this rig is modular enough to handle your custom kit (magazines, tourniquet, IFAK, etc), while keeping you agile enough for any change in environment. The plate pockets accommodate level III and IV hard armor plates, capable of stopping center fire rifle rounds, and front utility pockets offer extra storage for needed gear.

**Medium to High threat scenarios** - The Responder Base Plate Carrier, equipped with hard armor plates - offers durable & effective protection in any accelerating environment.
